

Virtual Fracture Clinic

Proximal radius fracture

Information for patients, relatives and carers

Introduction

The Virtual Fracture Clinic (VFC) helps you recover from your injury without needing to come back to the hospital. This is called self-management.

Use the rehabilitation plan in this leaflet to guide your recovery.

Video about your injury and recovery

Watch this video to help your recovery. A doctor explains your injury and a physiotherapist shows how to do the exercises:

www.fracturecare.co.uk/care-plans/elbow/proximal-radius-fracture/

What is a proximal radius fracture

This is a break to one of the bones in your elbow, called the proximal radius. The location is shown in the picture.

Healing

It normally takes 6 to 12 weeks for this fracture to heal.

Smoking slows down your healing. So, we advise that you stop smoking (including vaping) while your fracture heals. For more information, talk to your GP or go to nhs.uk/better-health/quit-smoking/

Pain and swelling

Your elbow may be swollen. You will have some pain.

You can help reduce pain and swelling by:

- taking pain medication
- using ice or cold packs

Wearing your sling

Your sling should be worn for comfort in the first 2 weeks.

You can take it off to wash, dress and exercise.

It does not need to be worn at night.

Exercise and activity

It is important to start exercises as soon as possible. Good rehabilitation will improve your recovery. Elbows get stiff very quickly.

You can expect some discomfort at first. Do not continue if the pain gets worse and you cannot tolerate it.

Follow the instructions on the next pages.

You should avoid lifting anything more than the weight of a cup of tea for the first 6 weeks.

You can do light activities when your pain has settled.

Caring for you injury: weeks 1 to 6

Wear your sling for the first 2 weeks. Take the sling off for washing, dressing and to do your exercises.

Using a cold pack will help with your pain and swelling.

- use an ice pack or bag of frozen peas wrapped in a damp towel
- put this on your elbow for up to 15 minutes every few hours
- make sure the ice is not in direct contact with your skin

Try to rest your elbow, especially in the first 24 to 72 hours.

Exercises

Regular exercise will prevent stiffness and help to recover movement.

Try to do these exercises every hour. If this is too painful, start with 3 to 4 times a day.

Repeat each exercise 10 times.

Hand and wrist exercises:

Open and close your hand.

Next, move your wrist up and down. Repeat 10 times.

After a few days, hold a soft ball or rolled up socks.

Squeeze the ball and hold for 5 seconds. Repeat 5 times.

Bend and straighten your elbow.

Repeat 10 times.

Bend your elbow to a right angle.

Slowly turn your palm up to the ceiling and down to the ground.

Repeat 10 times.

Caring for you injury: weeks 6 to 12

Your fracture should now be healed.

You can gradually increase your day-to-day activity. Be guided by any pain or discomfort you may still have.

You can expect to have mild discomfort. This may continue for 3 to 6 months.

Frequently asked questions

I'm concerned about my symptoms and struggling to exercise. What do I do?

Please contact the VFC.

I am struggling with my sling. What do I do?

Contact the VFC. We are happy to give further advice or change your sling if needed.

When can I drive again?

You can return to driving when:

- you are no longer using your boot,
- you can walk comfortably and
- you can perform an emergency stop pain free

Always test how well you can drive in a safe place first.

How can I get a 'fit note' for work?

Ask your GP for a 'fitness for work' statement. You can give this to your employer.

What do I do with my sling when I no longer need it?

Your sling cannot be used again, so you do not need to return it.

Contact the VFC

We're here to help if you've got concerns about your injury, symptoms or exercises.

Call us on 077 7455 5354 (Monday to Friday between 09.00 and 17.00).

Or you can **email** imperial.vfc@nhs.net.

So, please contact us if you:

- have any concerns about your injury or symptoms
- cannot follow this rehabilitation plan

-
- are expecting an appointment letter and have not received it
 - need help with your sling

How do I make a comment about my visit?

We aim to provide the best possible service. Staff will be happy to answer your questions. So, if you have **suggestions** or **comments** about your visit, please talk to a member of staff. Or you can contact the patient advice and liaison service (**PALS**). Call **020 3312 7777** (10.00 – 16.00, Monday to Friday) or email PALS at imperial.pals@nhs.net

The PALS team will listen to your concerns and is often able to help solve problems on your behalf.

Or, to complain, contact our complaints department:

Call **020 3312 1337 / 1349** or email: ICHC-tr.Complaints@nhs.net

Or write to: Complaints department, fourth floor, Salton House, St Mary's Hospital, Praed Street, London W2 1NY

Alternative formats

This leaflet can be provided on request in large print or easy read, as a sound recording, in Braille or in alternative languages. Please email the communications team: imperial.communications@nhs.net
